Hmm,

Macro-level conferences

this article is very interesting. in the first para it mentions WEF and SXSW, 2 weeks ago i was thinking how do we position ourselves for them.

**BlockTech/Zap**

Let's start with listing the following 4 as comprehensively and exhaustively as possible. I prioritized them in what is potentially most potent and visible.

First 3 are very public, 4rth may include products that have been in the market or internally on the chopping block.

- (1) Every patent - (gov't granted, legally non-deniable)
- (2) Every testimony before any government, domestic or foreign
- (3) Every presentation (TV, convention)
- (4) Every product developed

Hamdan

- A. Please can you dig up everything as much as possible
- B. Define what firm or person was represented

Then we'll move towards the following 3.

- Every tangible accomplishment
- Every major client test use case
- Every article written
